

Deploying Neural Network Models for Customer Churn Prediction

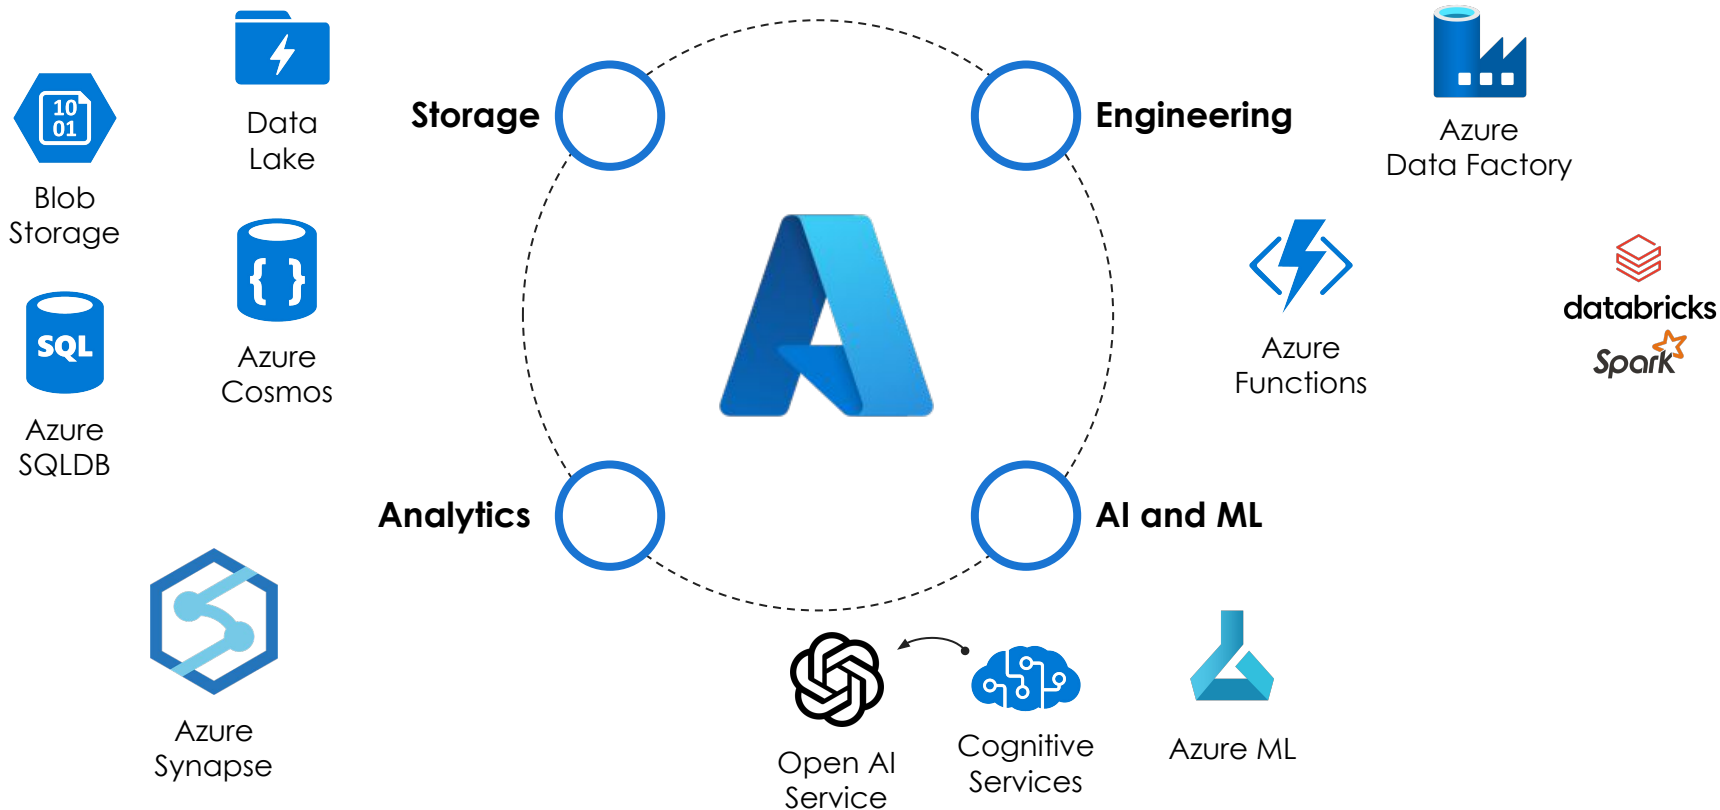

Agenda

- Big Picture - Deep Learning Lifecycle
- Azure Cloud services for Data Solutions
- Deep Learning Architecture on Azure
- Neural Network models
- Understand NN Training and Deployment (Hands-on with Azure ML)

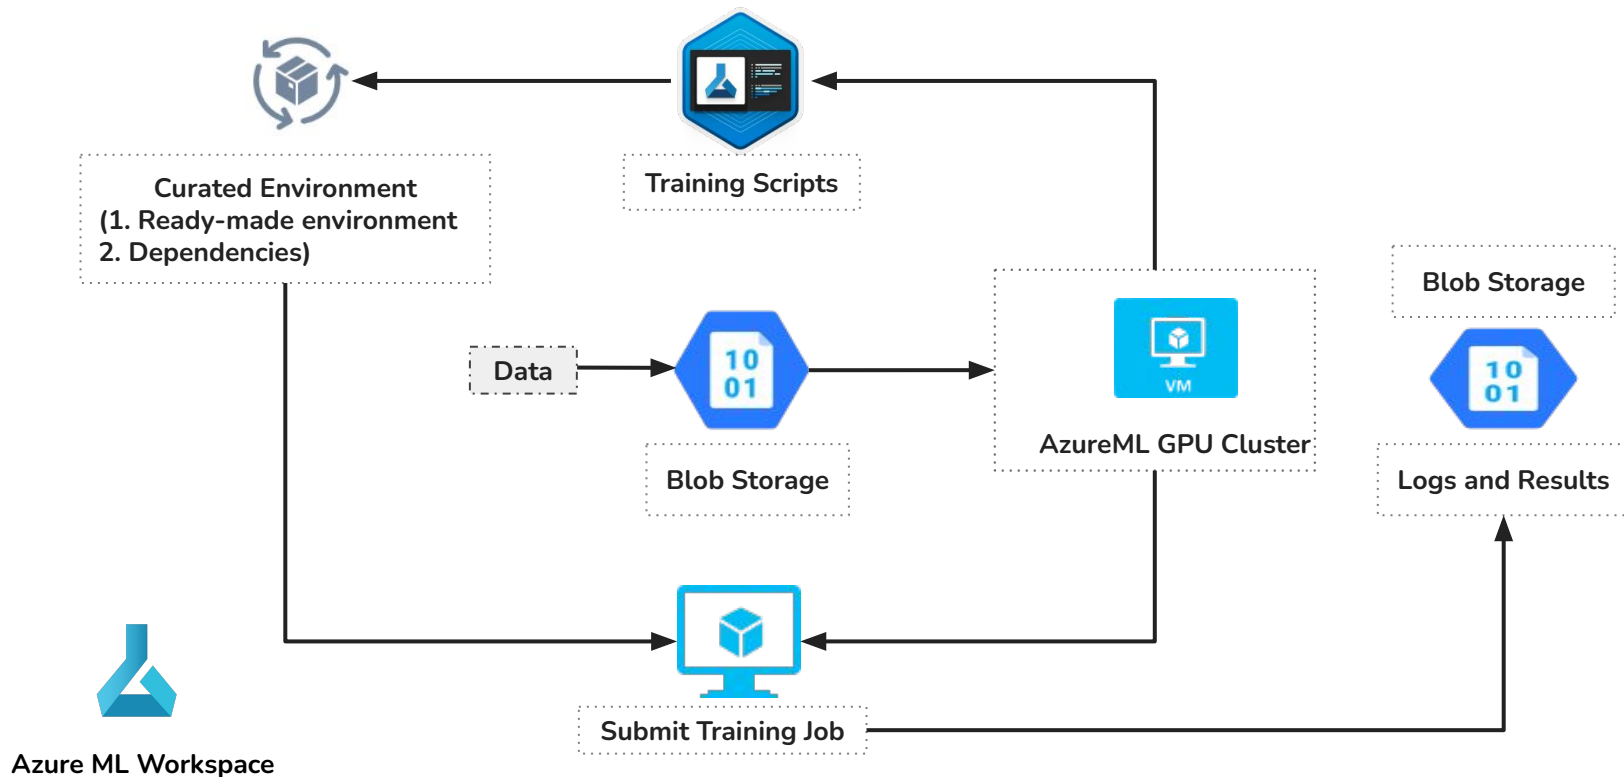

The Deep Learning Lifecycle

Azure Cloud services for Data Solutions

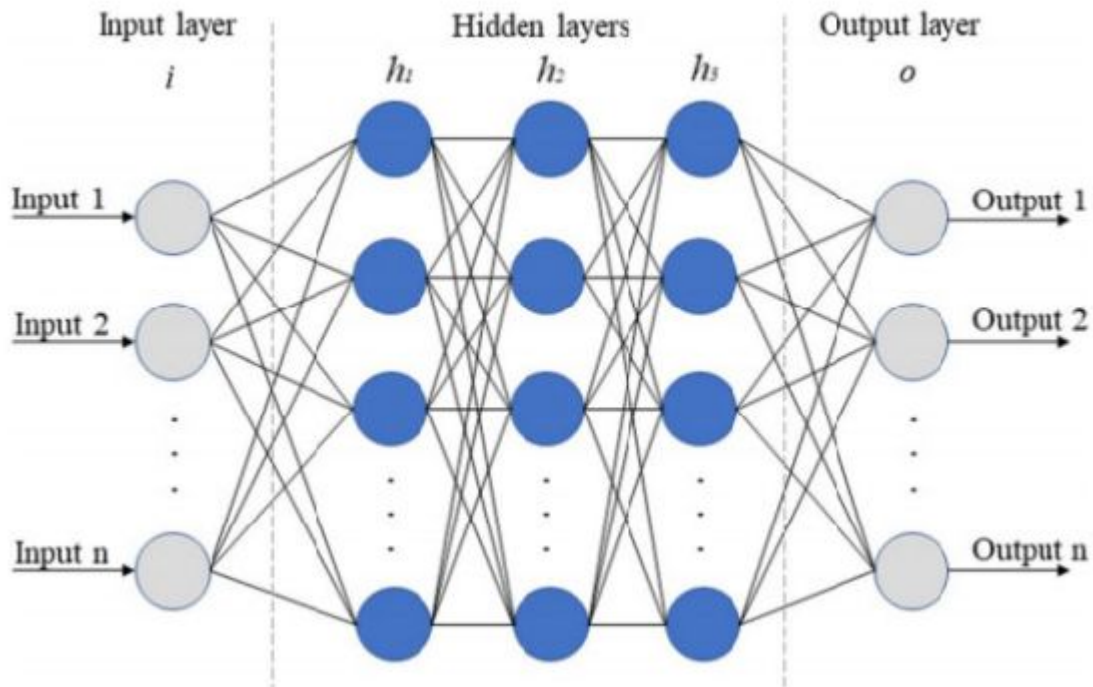

Deep Learning Architecture on Azure

Neural Network (NN) Overview

Basic NN Architecture

Convolutional Process

Pooling Process

Now let's jump to - “Hands-On Training of Deep Learning Models in Azure ML Studio”

Microsoft AI Professional Program (AI to OpenAI)”

Program Curriculum

1	Introduction to AI and the AI Value Chain
2	Fundamentals of SQL
3	SQL for AI Engineering
4	Python Programming Fundamentals
5	Exploratory Data Analysis on Python
6	Intelligent Reporting on Azure
7	Project-1
8	Learning Break
9	Machine Learning for Structured Data
10	Deep Learning for Computer Vision
11	Generative AI with Azure OpenAI
12	Prompt Engineering on Cloud
13	Generative AI for NLP Solutions
14	Project-2
15	Learning Break
16	Introduction to DevOps & MLOps
17	Deploying and Monitoring an ML Workflow
18	Project-3
Industry Webinar on Building Data Products	

Cloud Certifications

We will be using the Microsoft Azure platform as the cloud platform to perform hands-on exercises.

Along with the modules in MS-AI Professional Program, we will be diving into the preparation for Microsoft Certified: Azure Data Scientist Associate (DP 100) Certification.

Additionally, you will get the opportunity to prepare for Microsoft Applied Skills Exam and obtain its badge.

Happy Learning !
